Vermont Department of Social Welfare

Montpelier, Vermont

This is our nineteenth annual report to the citizens of the Town of Pawlet on State payments in your municipality of various types of assistance and welfare during 1954.

The total number of recipients in the State has remained stable for four years but expenditures are larger by reason of increases in payments authorized by the Legislature and increases in cost of services, including rent. Funds for the support of these programs were derived from the Federal and State Governments. The towns and cities participated financially in two of the programs as indicated below. Administrative expenses for the four types of Public Assistance were the lowest in the North Atlantic States and among the lowest in the nation.

Old Age Assistance	\$ 14,399.00
Aid to Dependent Children*	1,989.00
Aid to the Disabled	1,434.00
Committed Children**	654.22

Total	\$ 18,476.22

W. ARTHUR SIMPSON,

REPORT OF SUPERINTENDENT OF SCHOOLS

BENNINGTON - RUTLAND DISTRICT

EDWIN L. BIGELOW

Superintendent of Schools

Manchester Center, Vermont

January 15, 1955

MEMBERS OF THE SCHOOL BOARD:

The Pawlet Schools opened in September with an enrollment of 160, compared with 168 the previous year, and with an average of 166 for the preceding five years.

There were 174 different elementary pupils (84 boys, 90 girls) enrolled for the school year ending June 30, and there were also 50 secondary pupils for that year. The percentage of attendance was 94.1, and 93.4% of those in school in June were promoted to their next grade.

During the year a revision of the Geography and History courses was completed with new texts placed in the upper four grades. Now the advanced U. S. History is covered with a 2-volume text in two grades, 7 and 8. This should result in the work being covered more thoroughly and easily. The geographies for the 3rd grade which had become badly worn were replaced with a new edition of the same text. The basal reading system is in process of revision, and the edition now in use should be replaced as rapidly as possible.

Everyone intimately concerned with them must be much pleased with the three nice items of plant improvement carried out in the latter part of the year.

1. The greened chalk boards at West Pawlet create a very welcome change in the appearance of those classrooms.

2. The purchase of additional seating units, mostly for the West Pawlet school, a procedure that should continue until the schools are fully equipped, though the need is greater at the West Pawlet school.
3. The new kitchen at Pawlet Village will be greatly appreciated by those who work on the lunch program there.

It is unfortunate that the West Pawlet school has so little playground area, but there does not seem to be anything that can be done about it. The ventilating system in that school should be repaired and put into operation. In its present condition, I am quite certain that the situation falls far short of meeting the state health standards of school ventilation.

One possible improvement in Pawlet's school organization that would result in better instruction, and could be carried out without the expense of a new building, would be to make the West Pawlet school one of 4 rooms with two grades to a room, and the Village school one of six grades with two grades to a room. This would necessitate transportation of Pawlet 7th and 8th grade pupils to West Pawlet, and while that would involve some problems they do not appear insuperable.

While such a procedure would not be equal to a central school and may not be the permanent solution of Pawlet's school problem, it may possess sufficient merit to be worth considering as a definite improvement in the town's school organization. The present scheme of fitting 8 grades into three rooms in both schools is a far from satisfactory type of organization.

Respectfully submitted,

EDWIN L. BIGELOW,
Superintendent of Schools

REPORT OF THE PUBLIC HEALTH NURSING PROGRAM

Vermont Department of Health January 1, 1954 to January 1, 1955

The Public Health Nursing Division of the Vermont Department of Health reports the following services rendered by Miss Agnes McElroy, R.N., and Mrs. Darthea N. Emslie, R.N.:

15 people were served:

2 for the prevention and control of communicable diseases.

13 for other types of diseases.

62 visits were made:

12 visits in behalf of the program.

3 visits for the prevention and control of communicable diseases.

47 visits for other types of diseases.

Medical conferences were arranged by Mrs. Wilson Rogers and Mrs. Francis McCauliffe, members of the Parent Teachers Association, and financed by the Vermont Department of Health.

2 Infant and preschool medical conferences:

26 children were examined by Dr. W. S. Bennett.

3 School medical conferences:

42 children were examined by Dr. G. McGinniss and Dr. W. S. Bennett.

IMMUNIZATIONS:

Smallpox:

20 children were vaccinated.

5 children were re-vaccinated.

Diphtheria, Pertussis and Tetanus:

11 children received the booster dose.

Diphtheria and Tetanus:

1 child completed the series of doses.

8 children received the booster dose.

Your public health nurse and community physican have noticed a high rate of dental decay and lack of oral hygiene in the children seen at the medical conferences. This tremendous problem has faced Vermont residents many years. A large number of Vermonters were rejected by Selective Service in World War II because of dental defects.

The maintenance of good health as well as good dental health must start with the preschool child and be maintained through life.

Respectfully submitted,

LOIS STEARNS, R. N.

Public Health Nursing Supervisor
